Ås, Norway

EXPERIENCE

KS Analyst

Samfunnet i Ås

10/2023 - 12/2025 | Ås, Norway

- Built and maintained finance and operations reporting in spreadsheets and Power BI, supporting planning and follow-up across 5+ major events and 10+ weekly operations.
- Designed KPI reporting tracking 50+ metrics, including clear definitions, documentation, and consistent refresh routines to improve reliability and traceability.
- Streamlined reporting workflows by standardizing templates and simplifying recurring steps, reducing manual work and improving accuracy in periodic reporting.
- Performed quick-turnaround analysis to identify gaps, inconsistencies, and improvement opportunities, and communicated findings to non-technical stakeholders.
- Worked closely with cross-functional stakeholders to clarify needs, redesign reporting outputs, and deliver improvements with clear ownership.

R&D Intern

Unipolar Automation Technologies

11/2021 - 07/2022 | Dhaka, Bangladesh

- Supported delivery of a subscription-based public Wi-Fi system by gathering requirements, documenting workflows, and coordinating execution with technical and business stakeholders.
- Helped improve internal routines by structuring follow-up information and documentation, increasing clarity and consistency in delivery processes.
- Contributed to troubleshooting and continuous improvement by analyzing issue patterns and supporting prioritization of fixes.

EDUCATION

Masters in Data Science

Norges Miljø- og Biovitenskapelige Universitet

08/2022 - 08/2025 | Ås, Norway

- Relevant courses: Data-driven decision making, Machine learning, Deep learning, Data management and analysis, advanced programming in Python, and Image processing.
- Thesis: "AI-Based Foul Detection and Card-booking in Soccer" - Designed a deep learning pipeline using CNN-based and Transformer-based models for multi-view video analysis in soccer.

Average Grade

B / Avg

B.Sc. in Computer Science and Engineering

Bangladesh Army International University of Science & Technology

03/2016 - 08/2020 | Cumilla, Bangladesh

- Relevant Courses: Data Structure and Algorithm, Object Oriented Programming (Python), Database Management System (SQL), Data Mining, and System Analysis & Design
- Thesis: "Implementation of a Novel Hybrid Model for Bengali Text Summarization using Conventional Extractive Method and Text-Rank Algorithm"

GPA

3.97 / 4.0

PROJECTS

Operational Analytics Dashboard for Fish Health & Weather Data

https://github.com/JonyKarmakar/StreamsyncProject

Built an interactive analytics dashboard using Python, Spark, Cassandra, and StreamsSync to visualize trends, integrated and collected API data, and forecasted operational metrics related to fish health and weather conditions.

- Technical Highlights:** Python, Docker, Spark, Cassandra, API Integration, Data Quality, Data Collection & Integration, Data Visualization, Predictive Modeling, Dashboarding, Deployment. (VS Code, Streamsync)

SUMMARY

Data Science graduate with a structured, hands-on approach to building reliable reporting and decision support. Experienced in establishing Power BI dashboards, data models, and KPI standards, and connecting data from Excel, SQL, and operational systems into a single source of truth. Strong in translating business needs into practical solutions, documenting best practices, and improving data quality over time. Self-driven, communicative, and motivated by building analytics capabilities that are used daily.

SKILLS

Programming & Analytical Tools

Python, SQL, Jupyter Notebooks, Power BI, Tableau, Google Sheets, Excel, Looker Studio

Core Competencies

Adaptability, Cross-Functional Collaboration, Curious Mindset, Creativity, Continuous Learning, Goal-Oriented, Integrity, Motivated, Proactive, Project Management, Strong Analytical Skills, Strong Communication Skills, Team Player

BI & Reporting

SQL-based Datasets, KPI Reporting, Dashboard Development, Data Modeling, Drill-down Reporting, Stakeholder Reporting

Process Automation & Optimisation

Workflow Automation, Process Mapping, Process Redesign, Standardisation, Documentation, Controls-minded Reporting, Quality Checks

Data Analysis

Targeted Analysis, Variance/Deviation Analysis, Trend Analysis, Data Validation, Reconciliation

Cloud & Infrastructure

Azure, AWS, Database Management, Cloud Data Integration, Git, CI/CD

Collaboration & Delivery

Agile Methods, Jira, Trello, GitHub, Google Workspace, Cross-Functional Coordination

CERTIFICATIONS

Microsoft Power BI Data Analyst Professional Certificate

Microsoft, Coursera (Feb'2026)

Google IT Automation with Python, Professional Certificate

Google, Coursera (Oct'2021)

Microsoft Certified: Azure Fundamentals (Ongoing)

Microsoft

PROJECTS

Sales Dashboard & KPI Reporting (Power BI)

Developed a fully interactive Power BI dashboard for sales and operational KPIs. Structured data models, built DAX measures, and created drill-down reporting for real-time decision making.

- *Technical Highlights:* Data Management, Data Modeling, DAX, Reporting, KPIs, Dashboard, Role-Based Access Control (RBAC), Forecasting (PowerBI).

Data Analysis & Workflow Automation with Classical ML Technique

🔗 <https://github.com/JonyKarmakar/MachineLearning>

Participated in development of predictive modeling using Python, focusing on data preprocessing, ETL, feature generation, and evaluation.

- *Technical Highlights:* Python, data preprocessing, model optimization, predictive modeling (VS Code).

Tailwind Traders Sales, Profit & Executive Dashboard (Power BI)

The project was designed as a scenario-based approach simulating the demands of a real business environment, requiring proficiency in the techniques using Power BI.

- *Technical Highlights:* Role-Based Access Control (RBAC), Data Visualization Software, SQL, Data Modeling, Dashboard, Power BI, Data Analysis, Data Management, Data Security

Spotify Data Analysis

🔗 <https://github.com/JonyKarmakar/MachineLearning/tree/main/CA1>

Analyzed Spotify user data for patterns in popularity, audio features, and genre traits. Used distribution, correlation, regression, and clustering to explore track features' impact on listener engagement.

- *Technical Highlights:* Python, pandas, EDA, Correlation Analysis, Regression, Clustering, Statistical Testing (VS Code)

Deep Learning Pipeline Development

🔗 <https://github.com/JonyKarmakar/DeepLearning>

Implemented data preprocessing and experiments for model development in Python. Designed modular workflows to process datasets and assess performance across setups.

- *Technical Highlights:* Python, Data Pipelines, Experiment Tracking, Workflow Structuring, Data Preprocessing, Hyperparameter Tuning, Neural Networks(VS Code).

Sentiment Analysis of customer comments for products from an e-commerce site

🔗 <http://github.com/JonyKarmakar/SentimentAnalysis>

Conducted sentiment analysis on e-commerce customer reviews written in Bengali, applying NLP and machine learning techniques to classify sentiments.

- *Technical Highlights:* Python, Bayesian Theorem, Machine Learning, Natural Language Processing (NLP), NLTK, data preprocessing (Google Colab).

Airbnb Price and Demand Analysis

Analyzed Airbnb listing data to study pricing patterns and factors influencing host behavior and customer demand. Performed feature engineering, outlier treatment, trend analysis, and regression modeling to interpret key drivers of price variability across neighborhoods.

- *Technical Highlights:* Python, EDA, Regression Modeling, Data Cleaning, Visualization, pandas, scikit learn

Restaurant Review Analysis

🔗 <https://github.com/JonyKarmakar/RestaurantReview>

Created analytical report from customer reviews of restaurants in Weka

- *Technical Highlights:* Sentiment analysis, data preprocessing, data mining, machine learning (Weka).

TRAINING / COURSES

Networking and Basic Server Management

BAIUST ICT WING

Competitive Programming Boot Camp

Bangladesh Advanced Computing Society (BACS)

KEY ACHIEVEMENTS

Budget Analysis Expertise

Being part of managing a NOK 1.5M budget, leading to a 10% cost reduction through financial analysis.

KPI Dashboard Development

Developed dashboards tracking 50+ metrics, improving decision-making efficiency by 25%.

Operational Efficiency Enhancement

Presented strategic insights leading to a 15% increase in operational efficiency.

AWARDS

Vice Chancellor's Academic Achievement Award

BAIUST

Runner-up in Project Showcasing (Software)

BAIUST Computer Club

Dean's Scholarship for Academic Excellence

BAIUST
